I use CARB's database to double check our info, and the District's list of rules - in case we miss something. SPECS is the 3<sup>rd</sup> database EPA R9 has migrated to for submittals - I'm not proficient with it yet. I was specifically looking for SJ 4692 and not working on any RACT SIP when this popped up.

Hi Stan,

Steph and I are the owners/users of that database – so this is likely just something that we missed. We'll make sure to go in and double check all the rules that were in the 3<sup>rd</sup> quarter package last year and update them as needed.

That's interesting to hear that you use our RLDB to check to see when something is submitted. Since all submittals are going through SPeCS now, do you also double check that system to verify the dates?

Thanks,

*Ariel Fideldy*

Ariel, Stephanie,

Not sure who to pass this along to.

I use CARB's Rules Log Database to check if/when a rule was submitted to EPA.

The database doesn't show the 2018 3<sup>rd</sup> qtr submittals for  
SJ 4692 (Commercial Cooking) and  
4905 (Natural gas fired residential furnaces)

I spot checked Antelope 1110.2 (10/2018 submittal) and Sac Metro 414 (1/31/2019 submittal) and they are listed in the rules log database so maybe its just the 3<sup>rd</sup> qtr submittal that is missing. I didn't check the database for any other missing submittals.

Thanks for any help you can provide to pass this to the right group.

Stan
